

## Recombinant Human ACE2 protein

CatalogNo: YD2195

### | Key Features

#### Reactivity

- Human

#### MW

- 86kD (Calculated)  
100-110kD (Observed)

#### Applications

- ELISA, ECL, Immunogold,

### | Recommended Dilution Ratios

Testing in progress

### | Storage

#### Storage\*

Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 °C for one week . Store at -20 to -80 °C for twelve months from the date of receipt.

### | Basic Information

Source	Mammalian cells
Purification	Mammalian cells
Purity	>90% as determined by SDS-PAGE

### | Immunogen Information

### | Target Information

Gene name ACE2

<b>Protein Name</b>	ACE-related carboxypeptidase Angiotensin-converting enzyme homolog Metalloprotease MPROT15		
	<b>Organism</b>	<b>Gene ID</b>	<b>UniProt ID</b>
	Human	<a href="#">NP_001358344.1 or Q9BYF1;</a>	<a href="#">Q9BYF1;</a>
	Mouse		<a href="#">Q8R0I0;</a>

**Function** Angiotensin-Converting Enzyme 2 (ACE-2) is an integral membrane protein and a zinc metalloprotease of the ACE family, the ACE family includes somatic and germinal ACE. ACE-2 cleaves angiotensins I and II as a carboxypeptidase, ACE-2 converts angiotensin I to angiotensin 1-9, and angiotensin II to angiotensin 1-7. ACE-2 is also able to hydrolyze apelin-13 and dynorphin-13 with high efficiency. ACE-2 can be high expressed in testis, kidney and heart, in colon, small intestine and ovary at moderate levels. Captopril and lisinopril as the classical ACE inhibitor don't inhibit ACE-2 activity. ACE-2 may play an important role in regulating the heart function.
