**Applications** 

WB,ELISA

# **ZDH17 Rabbit pAb**

CatalogNo: YN1828

### **Key Features**

Host Species Reactivity

Rabbit
Human, Mouse

MW Isotype • 69kD (Observed) • IgG

### **Recommended Dilution Ratios**

WB 1:500-2000 ELISA 1:5000-20000

## Storage

Storage\* -15°C to -25°C/1 year(Do not lower than -25°C)

**Formulation** Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.

### **Basic Information**

**Clonality** Polyclonal

# Immunogen Information

**Immunogen** Synthesized peptide derived from part region of human protein

**Specificity** ZDH17 Polyclonal Antibody detects endogenous levels of protein.

### | Target Information

Gene name ZDHHC17 HIP14 HIP3 HYPH KIAA0946 HSPC294

#### **Protein Name**

Palmitoyltransferase ZDHHC17 (Huntingtin yeast partner H) (Huntingtin-interacting protein 14) (HIP-14) (Huntingtin-interacting protein 3) (HIP-3) (Huntingtin-interacting protein H) (Putative MAPK-activating protein PM11) (Putative NF-kappa-B-activating protein 205) (Zinc finger DHHC domain-containing protein 17) (DHHC-17)

Orga	nism	Gene ID	UniProt ID
Hui	man	<u>23390</u> ;	<u>Q8IUH5</u> ;
Мо	use		<u>Q80TN5</u> ;

### Cellular Localization

Golgi apparatus membrane ; Multi-pass membrane protein . Cytoplasmic vesicle membrane ; Multi-pass membrane protein . Cell junction, synapse, presynaptic cell membrane ; Multipass membrane protein. Low extracellular Mg(2+) induces increase in Golgi and in post-Golgi membrane vesicles. .

Tissue specificity Expressed in all brain regions. Expression is highest in the cortex, cerebellum, occipital lobe and caudate and lowest in the spinal cord. Expression is also seen in testis, pancreas, heart and kidney.

Catalytic activity:Palmitoyl-CoA + protein-cysteine = S-palmitoyl protein +

### Function

CoA., Domain: The DHHC domain is required for palmitoyltransferase activity..Function:Palmitovltransferase specific for a subset of neuronal proteins, including SNAP25, DLG4/PSD95, GAD2, SYT1 and HD. May be involved in the sorting or targeting of critical proteins involved in the initiating events of endocytosis at the plasma membrane. May be involved in the NF-kappa-B signaling pathway. Has transforming activity, miscellaneous: The early and prominent pathology of HD is observed in the medium spiny neurons that project into the globus., similarity: Belongs to the DHHC palmitoyltransferase family. AKR/ZDHHC17 subfamily., similarity: Contains 1 DHHC-type zinc finger., similarity: Contains 5 ANK repeats., subunit: Binds HD. This interaction is inversely correlated to the length of the polyglutamine tract added to the huntingtin protein in Huntington disease., tissue specificity: Expressed in all brain regions. Expression is highest in the cortex, cerebellum, occipital lobe and caudate and lowest in the spinal cord. Expression is also seen in testis, pancreas, heart and kidney.,

### Validation Data

ZDHHC17 participates in the pathogenesis of polycystic ovary syndrome by affecting androgen conversion to estrogen in granulosa cells. MOLECULAR AND CELLULAR ENDOCRINOLOGY Zhigang Guo WB,IP Mouse 1:1000,1:400 ovarian tissues GRM02 cell
