

YAP (Phospho Ser397) Rabbit pAb

CatalogNo: YP1554

Key Features

Host Species • Rabbit	Reactivity • Human,Mouse,Rat	Applications • WB
MW • 67kD (Observed)	Isotype • IgG	

Recommended Dilution Ratios

WB 1:1000-2000

Storage

Storage*	-15°C to -25°C/1 year(Do not lower than -25°C)
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Basic Information

Clonality Polyclonal

Immunogen Information

Immunogen	Synthesized phosho peptide around human YAP (Ser397)
Specificity	This antibody detects endogenous levels of Human Mouse Rat YAP (phospho-Ser397)

Target Information

Gene name YAP1 YAP65

Protein Name YAP (Ser397)

Organism	Gene ID	UniProt ID
Human	<u>10413;</u>	<u>P46937;</u>
Mouse	<u>22601;</u>	<u>P46938;</u>
Rat	<u>363014;</u>	<u>Q2EJA0;</u>

Cellular Localization Cytoplasm . Nucleus . Both phosphorylation and cell density can regulate its subcellular localization (PubMed:18158288, PubMed:20048001). Phosphorylation sequesters it in the cytoplasm by inhibiting its translocation into the nucleus (PubMed:18158288, PubMed:20048001). At low density, predominantly nuclear and is translocated to the cytoplasm at high density (PubMed:18158288, PubMed:20048001, PubMed:25849865). PTPN14 induces translocation from the nucleus to the cytoplasm (PubMed:22525271). Localized mainly to the nucleus in the early stages of embryo development with expression becoming evident in the cytoplasm at the blastocyst and epiblast stages (By similarity). .

Tissue specificity Increased expression seen in some liver and prostate cancers. Isoforms lacking the transactivation domain found in striatal neurons of patients with Huntington disease (at protein level).

FunctionPTM:Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Contains 1 WW
domain.,subunit:Binds to the SH3 domain of the YES kinase. Binds to WBP1 and WBP2.
Binds, in vitro, through the WW1 domain, to neural isoforms of ENAH that contain the PPSY
motif.,
