

ROS1 (Phospho Tyr2114) Rabbit pAb

CatalogNo: YP1613

Key Features

Host Species

- Rabbit

Reactivity

- Human, Mouse, Rat

Applications

- WB, ELISA

MW

- 258kD (Observed)

Isotype

- IgG

Storage

Storage* -15°C to -25°C/1 year (Do not lower than -25°C)

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Recommended Dilution Ratios

WB 1:1000-2000

ELISA 1:5000-20000

Basic Information

Clonality Polyclonal

Immunogen Information

Immunogen Synthesized peptide derived from human ROS (Phospho Tyr2114)

Specificity This antibody detects endogenous levels of Human, Mouse, Rat ROS (Phospho Tyr2114). The name of modified sites may be influenced by many factors, such as species (the modified site was not originally found in human samples) and the change of protein sequence (the previous protein sequence is incomplete, and the protein sequence may be prolonged with the development of protein sequencing technology). When naming, we will use the "numbers" in historical reference to keep the sites consistent with the reports. The antibody binds to the following modification sequence (lowercase letters are modification sites): NDyYR

Target Information

Gene name ROS1 MCF3 ROS

Protein Name ROS1 (Phospho Tyr2114)

Organism	Gene ID	UniProt ID
Human	6098;	P08922;
Mouse	19886;	Q78DX7;
Rat	25346;	Q63132;

Cellular Localization Cell membrane ; Single-pass type I membrane protein .

Tissue specificity Expressed in brain. Expression is increased in primary gliomas.

Function Catalytic activity:ATP + a [protein]-L-tyrosine = ADP + a [protein]-L-tyrosine phosphate. ,Disease:A chromosomal aberration involving ROS1 is found in glioblastoma multiform (GBM) . An homozygous deletion in chromosome 6q21 results in expression of a GOPC-ROS1 chimeric protein which has a constitutive receptor tyrosine kinase activity. ,Function:This is probably a cell growth or differentiation factor receptor with a tyrosine-protein kinase activity. ,similarity:Belongs to the protein kinase superfamily. Tyr protein kinase family. Insulin receptor subfamily. ,similarity:Contains 1 protein kinase domain. ,similarity:Contains 9 fibronectin type-III domains. ,
