

14-3-3 σ (Phospho Ser186) Rabbit pAb

CatalogNo: YP1614 **Orthogonal Validated** 

Key Features

Host Species

- Rabbit

Reactivity

- Human, Mouse

Applications

- WB, ELISA

MW

- 30kD (Observed)

Isotype

- IgG

Storage

Storage* -15°C to -25°C/1 year (Do not lower than -25°C)

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Recommended Dilution Ratios

WB 1:1000-2000

ELISA 1:5000-20000

Basic Information

Clonality Polyclonal

Immunogen Information

Immunogen Synthesized peptide derived from human 14-3-3 σ (Phospho Ser186)

Specificity This antibody detects endogenous levels of Human, Mouse 14-3-3 σ (Phospho Ser186). The name of modified sites may be influenced by many factors, such as species (the modified site was not originally found in human samples) and the change of protein sequence (the previous protein sequence is incomplete, and the protein sequence may be prolonged with the development of protein sequencing technology). When naming, we will use the "numbers" in historical reference to keep the sites consistent with the reports. The antibody binds to the following modification sequence (lowercase letters are modification sites): ANsPE

Target Information

Gene name SFN HME1

Protein Name 14-3-3 σ (Phospho Ser186)

Organism	Gene ID	UniProt ID
Human	2810 ;	P31947 ;
Mouse	55948 ;	O70456 ;

Cellular Localization Cytoplasm. Nucleus . Secreted. May be secreted by a non-classical secretory pathway.

Tissue specificity Present mainly in tissues enriched in stratified squamous keratinizing epithelium.

Function Function:Adapter protein implicated in the regulation of a large spectrum of both general and specialized signaling pathway. Binds to a large number of partners , usually by recognition of a phosphoserine or phosphothreonine motif. Binding generally results in the modulation of the activity of the binding partner. When bound to KRT17 , regulates protein synthesis and epithelial cell growth by stimulating Akt/mTOR pathway. ,Function:p53-regulated inhibitor of G2/M progression. ,similarity:Belongs to the 14-3-3 family. ,subcellular location:May be secreted by a non-classical secretory pathway. ,subunit:Homodimer. Interacts with KRT17 (By similarity) . Found in a complex with XPO7 , EIF4A1 , ARHGAP1 , VPS26A , VPS29 , VPS35 and SFN. ,tissue specificity:Present mainly in tissues enriched in stratified squamous keratinising epithelium. ,

Validation Data

Western Blot analysis of 1 A431 cell 2 LPS 100ng/mL 30min treated ,using primary antibody at 1:1000 dilution. Secondary antibody (catalog#:RS23920) was diluted at 1:10000
