

XRCC1 (Phospho Thr284) Rabbit pAb

CatalogNo: YP1744 **Orthogonal Validated** 

Key Features

Host Species

- Rabbit

Reactivity

- Human, Mouse, Rat

Applications

- WB

MW

- 70kD (Calculated)

Isotype

- IgG

Storage

Storage* -15°C to -25°C/1 year (Do not lower than -25°C)

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Recommended Dilution Ratios

WB 1:500-2000

Basic Information

Clonality Polyclonal

Immunogen Information

Immunogen Synthesized peptide derived from human XRCC1 (Phospho-Thr284)

Specificity This antibody detects endogenous levels of XRCC1 (Phospho-Thr284) at Human, Mouse, Rat. The name of modified sites may be influenced by many factors, such as species (the modified site was not originally found in human samples) and the change of protein sequence (the previous protein sequence is incomplete, and the protein sequence may be prolonged with the development of protein sequencing technology). When naming, we will use the "numbers" in historical reference to keep the sites consistent with the reports. The antibody binds to the following modification sequence (lowercase letters are modification sites): PA_tAP

Target Information

Gene name XRCC1

Protein Name XRCC1 (Phospho-Thr284)

Organism	Gene ID	UniProt ID
Human	7515;	P18887;
Mouse	22594;	Q60596;
Rat	84495;	Q9ESZ0;

Cellular Localization Nucleus . Moves from the nucleoli to the global nuclear chromatin upon DNA damage. .

Tissue specificity Expressed in fibroblasts , retinal pigmented epithelial cells and lymphoblastoid cells (at protein level) .

Function Function:Corrects defective DNA strand-break repair and sister chromatid exchange following treatment with ionizing radiation and alkylating agents. ,polymorphism:Carriers of the polymorphic Gln-399 allele may be at greater risk for tobacco- and age-related DNA damage. ,PTM:Phosphorylation of Ser-371 causes dimer dissociation. Phosphorylation by CK2 promotes interaction with APTX and APLF. ,PTM:Sumoylated. ,similarity:Contains 2 BRCT domains. ,subcellular location:Accumulates at sites of DNA damage. ,subunit:Homodimer. Interacts with polynucleotide kinase (PNK) , DNA polymerase-beta (POLB) and DNA ligase III (LIG3) . Interacts with APTX and APLF. ,

Validation Data

Western Blot analysis of 1 HeLa cell, 2 LPS 100ng/mL 30min treated ,using primary antibody at 1:1000 dilution. Secondary antibody (catalog#:RS23920) was diluted at 1:10000
