Lamin B1 (7C11) Mouse mAb (Biotin)

CatalogNo: YM2107 Comparable Abs

Key Features

Host Species Mouse 	ReactivityHuman,Rat,Mouse	Applications • WB,IHC,IF,IP
lsotype • lgG	Conjugate • Biotin	

Recommended Dilution Ratios

Optimal working dilutions should be determined experimentally by the investigator Suggested starting dilutions are as follows:WB 1:2000-5000 IHC 1:50-300.

Storage

Storage*	Stable for one year at -15°C to -25°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing.
Formulation	Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.

Basic Information

Clonality	Monoclonal
Clone Number	7C11

Immunogen Information

Specificity Lamin B1 Monoclonal Antibody(7C11) Biotin conjugated specially designed for your WB or IHC analysis.

Target Information

Gene name	LMNB1			
Protein Name	Lamin-B1			
	Organism	Gene ID	UniProt ID	
	Human	<u>4001;</u>	<u>P20700;</u>	
	Mouse	<u>16906;</u>	<u>P14733;</u>	
	Rat	<u>116685;</u>	<u>P70615;</u>	
Cellular Localization	Nucleus lamina .			
Tissue specificity	Brain,Cajal-Retzius cell,Epithelium,Eye,Fetal brain cortex,Ovarian carcinoma,Placenta,Uterus,			
Function	characterized by early autonomic symmetric demyelination of the demyelinating disorders in that the presence of subtotal demyel components of the nuclear lamin nuclear membrane, which is tho may also interact with chromatin strictly controlled by the cell cyc nuclear envelope in prophase ar series of modifications, such as	IM:169500]. ADLD is a presenting in the fourth ic abnormalities, pyran CNS. It differs from mu- neuropathology shows ination and lack of ast ha, a fibrous layer on t ught to provide a fram h.,miscellaneous:The s ele, as seen by the disin d telophase, respective farnesylation and phose ccurs before envelope ions.,similarity:Belonge	a slowly progressive and fatal h or fifth decade of life. Clinically midal and cerebellar dysfunction, and ultiple sclerosis and other preservation of oligodendroglia in crogliosis.,Function:Lamins are the nucleoplasmic side of the inner nework for the nuclear envelope and structural integrity of the lamina is ntegration and formation of the vely.,PTM:B-type lamins undergo a sphorylation. Increased disintegration and probably plays a s to the intermediate filament
